*"I understand the vocation of the intellectual as trying to turn easy answers into critical questions and putting those critical questions to people with power. The quest for truth, the quest for the good, the quest for the beautiful all require us to let suffering speak, let victims be visible and let social misery be put on the agenda of those with power."*

"Excellence is the result of caring more than others think is wise, risking more than others think is safe, dreaming more than others think is practical, and expecting more than others think is possible."
